TECHNICAL SKILLS

FRONTEND
React.js · TypeScript · Tailwind CSS · JavaScript

ANIMATION & 3D
GSAP · React Three Fiber · Scroll-driven UI

BACKEND & DATABASE
Node.js · Express.js · Python · Flask · MongoDB · Firebase

APIS & TOOLS
REST APIs · JWT Auth · Gemini API · Leaflet · Chart.js · Git / GitHub

STRENGTHS

Premium UI & motion design
Clean, scalable code
Business-first thinking
Real-world problem solving

LANGUAGES

English
Hindi

Available for Web Developer / Full-Stack roles & internships

PROFESSIONAL PROFILE

Full-stack web developer who builds **production-grade e-commerce platforms** and **AI-integrated web applications**. Proficient in React, TypeScript and Node.js, with a strong focus on premium UI, scroll-driven animation and clean, scalable code. Brings a practical, business-first approach shaped by hands-on experience turning real-world requirements into polished digital products.

FEATURED PROJECTS

BBBB Store – Premium E-Commerce Website | Full-stack · Live business use

React · TypeScript · React Three Fiber · GSAP · Tailwind CSS · Node.js · MongoDB

- Built a **production-grade e-commerce platform** for a family-run retail business, featuring premium 3D visuals and scroll-driven animations.
- Implemented cart persistence with **Zustand + localStorage**, **WhatsApp-based ordering** (wa.me integration) and a **JWT-authenticated admin panel**.
- Developed a **Node.js / Express backend with MongoDB** for product, order and inventory management.
- Designed a custom **onyx-black and antique-gold** brand identity for a cohesive, premium user experience.

AI-Powered Fake News Detection System | AI · Node.js

Node.js · Express · Google Gemini API · NewsData.io · JavaScript

- Rebuilt a legacy ML-based classifier into a **live news verification system** using the Google Gemini API and NewsData.io.
- Built a full **sidebar dashboard** with real-time verification results and JSON-based data persistence.
- Structured the Express backend to handle verification requests and news-source lookups end to end.

Dilli Pulse – Traffic Congestion Prediction Dashboard | Data · Python

Python · Ridge Regression · Leaflet · Chart.js · OSRM

- Developed a **New Delhi traffic congestion prediction dashboard** using Ridge Regression on synthetic traffic data.
- Integrated an **AI chat assistant**, simulated incident engine, **Ctrl+K command palette** and CSV export.
- Added live map routing via **OSRM** with Leaflet maps and Chart.js visualisations.

INDUSTRIAL TRAINING

Subhro Tech Co. – Completed industrial training, gaining hands-on, industry-style development experience alongside my BCA studies.

KEY HIGHLIGHTS

3	Live	3D + AI
Full-stack & AI projects built	Real retail business use case	Premium UI and Gemini integration
